

THE AIR ZOO AND PORTAGE
EDUCATION FOUNDATION

PRESENTS

Middle School Engineering **STEP Camp Night**

A Family Engineering Night for middle school students provides a unique and interactive way for families to come together and explore the fascinating world of engineering.

By engaging in hands-on activities and collaborative projects, youth gain a practical understanding of fundamental engineering principles and apply critical thinking and problem-solving skills.

This event highlights STEM fields while creating lasting memories for families, emphasizing the importance of teamwork and curiosity in the exciting realm of engineering.

EVENT HIGHLIGHTS

Engineering Tidbits

Engage in a variety of fun activities that provide an introduction to fundamental engineering principles.

Engineering Careers

Learn about the skills needed to become an engineer, right from a real engineer!

Engineering Challenge

Work together with your family to design, build, and test stomp rockets. Collaborate to make improvements to make your rocket soar even higher!

Community Engagement

Interact with local STEP camp organizations and learn about a variety of STEAM resources.

Must be a current PPS Middle School student to attend accompanied by a guardian. Thanks to the generosity of the PEF, this event is offered at no cost to PPS Middle School students and guardians.
